

CSE 322

Cisco Packet Tracer Online

Tasks:

- **Network Configuration** : Assign appropriate and unique ip addresses to all devices. For this, replace 'x.x.x.x' with appropriate ip addresses. Configure the network properly to enable communication among all devices. **10**
- **Routing Configuration** : You cannot use static routing. Use dynamic routing in such a way to achieve the following:
 - all packets from PC2 to PC1 will pass through Router0, Router3.
 - all packets from PC1 to PC2 will pass through Router3, Router0. **20**
- **ACL** : You need to implement ACL in such a way that:
 - PC0 cannot ping PC2.
 - PC0 cannot send ftp requests to PC1 (port number 21) **10**
